

FORMOSA!

Good luck can come our way, but sometimes misfortune may descend. Whether or not something succeeds may partly depend on chance, but as the saying "God helps those who help themselves" goes, it lies within ourselves to do the best we can.

Wang Yung-Tsai (1922-2014)

—"Chief engineer of the sixth naphtha cracker"

A photograph of Wang Yung-Tsai, an elderly man with a friendly expression, sitting on a dark leather armchair. He is wearing a dark blue suit, a white shirt, and a dark tie with small white dots. The background is dark and out of focus.

FORMOSA!

**As long as we persevere,
relinquish our fear of hardship or
difficulties, brave the pain
of discouragement and
setbacks, and continue to
move toward our goals,
we will eventually prevail.**

Wang Yung-Tsai (1922-2014)

—"Chief engineer of the sixth naphtha cracker"

FORMOSA!

A company must be honest and down-to-earth. Be honest and sincere both internally and externally, towards superiors and subordinates. This is also true in life, the importance of being honest and down-to-earth.

Wang Yung-Tsai (1922-2014)

—"Chief engineer of the sixth naphtha cracker"

FORMOSA!

The beginning is the hardest part in everything we do, but we must do it regardless; once we overcome the difficulties, things will go our way.

Wang Yung-Tsai (1922-2014)

—"Chief engineer of the sixth naphtha cracker"

FORMOSA!

We must work hard to learn everything we come in contact with and pursue excellence before things can fall into place.

Wang Yung-Tsai (1922-2014)
—"Chief engineer of the sixth naphtha cracker"

FORMOSA!

Have patience in all things,
and do not give up even
after difficulties arise if it is
something that must or
should be done.

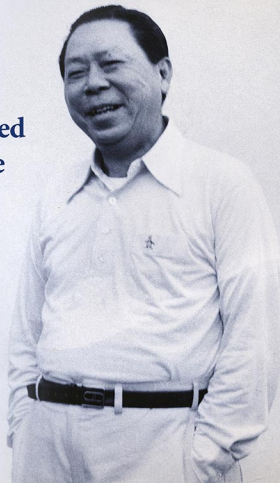

Wang Yung-Tsai (1922-2014)
—"Chief engineer of the sixth naphtha cracker"

FORMOSA!

The leader of an enterprise is tasked with finding the right man for the right job, so that every employee can show their full potential and pull together to achieve better business performance.

Wang Yung-Tsai (1922-2014)
—"Chief engineer of the sixth naphtha cracker"

FORMOSA!

It is always hard to do something meaningful, but exerting great effort in doing things will always produce results that are rewarding.

Wang Yung-Tsai (1922-2014)
—"Chief engineer of the
sixth naphtha cracker"

A group of about eight men are gathered on a construction site, likely a steel mill or refinery. They are wearing white hard hats and light-colored shirts. One man in the center is holding a small object, possibly a cigarette or a small tool. They are standing on a platform with large, curved metal pipes or conduits in the foreground. The background shows industrial structures and a clear sky.

FORMOSA!

As long as you let go of
your reservations, and
work together with others,
you will be able to achieve
good outcomes for even
the hardest tasks.

Wang Yung-Tsai (1922-2014)

—"Chief engineer of the sixth naphtha cracker"

It really depends on whether or not the leader is willing to probe into the issue. If the leader takes the effort to heed the opinions of others, advice and expertise will be gladly offered. It is with the concerted effort of all that issues can be resolved and good performance can be achieved.

Wang Yung-Tsai (1922-2014)
—"Chief engineer of the sixth naphtha cracker"

Do anything and everything with your heart and soul. Always consider ways to give things greater reason, how to bring people together, build a consensus, and collaborate, and unite people in jointly pursuing excellence under common goals with never ending persistence.

Wang Yung-Tsai (1922-2014)

—"Chief engineer of the sixth naphtha cracker"

FORMOSA!

It takes determination,
courage, and perseverance to
manage a business, but more
importantly, you must know
when to advance and when to
retreat, and whether to
follow the trend.
